

Overnight Gear List

Note on Equipment List: Each piece of gear on this list directly relates to your comfort and safety. This list is made for managing yourself in poor mountain weather. Each person may need to add additional layers if you run cold. We may choose to subtract certain layers if the weather forecast dictates.

Avalanche Safety:

- Antennae Transceiver (3 antennae with fresh batteries)
- Avalanche Shovel (metal required)
- Avalanche Probe

Skiing/Splitboarding:

- AT skis, Telemark or Splitboard
- Tech style bindings strongly recommended

For overnight trips guests will ride a snowmobile or our tracked UTV approximately 7 miles up to our Base Camp. The Base Camp includes a 16x20' wall tent for guest sleeping and a 20' Pacific Yurt for dining and hangout zone. There is a new sauna, waiting for you after a day of great skiing. We provide 0-degree down sleeping bags, sleeping pads, pillows, and sleeping bag liners.

All of your overnight gear and extra ski gear will get towed to camp in a snowmobile. You should note that due to unforeseen conditions, all of your extra gear needs to fit in your pack in the event a snowmobile breaks down or we receive a snowpocalypse! Please be mindful of extra gear, and if you're bringing excessive gear we reserve the right to charge you \$3/lb. A large stuff sack should accommodate all your goods!

Please let us know if you have any questions or concerns.
